ROBIN S. CAMERON

OBJECTIVE:

Pursue consulting opportunities providing AS/400 programming and application support either full-time or part-time to meet client requirements.

KEY KNOWLEDGE, SKILLS AND EXPERIENCE

Hardware

- AS/400
- IBM/370
- PC

Operating Systems

- OS/400
- MVS/TSO, VM/CMS
- Windows, OS/2, DOS

Languages

- RPG/400, DB2/400, CL/400, SQL/400
- PL/AS, PL/1, REXX
- MS Macro Assembler, C

Software Packages

- JD Edwards A6.2, A7.3 & A8.1, Future/3, Aldon CMS, TrustedLink/400

Industries

- Automotive
- Publishing
- Computer Hardware

EDUCATION

1979 - 1982 Northern Arizona University   Flagstaff, AZ
Bachelor of Science Business Administration - Data Processing

6146 Juneberry Ct
Liberty Twp OH 45011
Phone: 513-484-1236
Fax: 513-779-1379

CONSULTING EXPERIENCE

2003 - Present   Toyota Tsusho America, Inc.   Georgetown, KY
Technical Consultant

- Client is using a highly customized version of JDE 7.3 with DC Link. Primary responsibilities have been to program enhancements to support new business opportunities or to enhance current processes. Secondary responsibilities have been to assist with EDI implementation.

- Created a new set of programs to calculate charges for toll work and create the sales orders to invoice the mills for slitting and storage charges.

- Created interfaces for AP to upload credit card purchase data from the bank website for credit card payments. This interface used the IFS on the AS/400 to handle upload and conversion of CSV files for processing into the JDE using the AP batch load program.

- Replaced an existing set of interface programs with JDE programs. This eliminated the use of third party software, and the associated maintenance cost, and provided a set of programs that can be supported through the standard JDE development tools.

2002 – 2003   Thomson Learning   Cincinnati, OH
Technical Consultant (Interactive Business Systems)

- Developed a set of tools to assist with the import of conversion and interface data into JDE 7.3 GL, AP and AR applications. The tools process stream files stored in the AS/400 IFS and format the data into standard JDE files for processing by GL, AR and AP programs.

- Worked on two business integration projects to map business processes of acquired companies into the Thomson business process using both JDE World and One World applications. This included setting up conversion processes using the developed tool set, creating custom grids in One World and assisting with issues related to coexistence between World and One World.

1999 – 2002   JW Harris, Inc.   Cincinnati, OH
Technical Consultant

- Created cost accounting add-on to JDE 8.1 to duplicate function that was available in legacy system. This involved using product composition percentages and component prices to determine material costs of product. Work was in progress to move to JDE Advanced Stock Valuation application and eliminate the add-on programs.

- Analyzed the current Advanced Pricing setup and issues with costing. Fixed several bugs in JDE advanced pricing programs.

- Worked on a set of programs to convert Item Master data from a second legacy system into JDE. Assisted other programmers with the conversion of Address Book and Order History from the legacy system.

- Assisted with the setup of pricing structure from second legacy system in JDE using Advanced Pricing. This included setup for customer rebate tracking and reporting.

- Migrated reports from the second legacy system to JDE using a combination of custom programs for file creation and World Writer reports.

- Designed and implemented an interface between JDE and a customized warehouse management system using standard EDI functions within JDE.

- Assisted client with evaluation of SCM application including verifying setup requirements in supporting applications for successful implementation of PDP (Production and Distribution Planning).

- Provided ongoing support and enhancements for JDE in the areas of sales, distribution, warehousing, purchasing, finance, A/R and A/P.

1999 – 2002 NAPM, Inc.   Eaton, OH
Technical Consultant

- Customized shipping documents in Future/3 package to meet customer requirements.

- Resolved interface issues between Future/3 and JD Edwards for inventory management and invoicing.

- Created a customized forecast entry/tracking system, which utilizes information from Future/3 and JDE.

- Provided ongoing support and enhancements for JD Edwards in the areas of sales, distribution, purchasing, finance, A/R and A/P.

-
- 1995 - 1997   Whitman-Hart, Inc.   Cincinnati, OH
- Senior Consultant

- Worked with other technical consultants to enhance and improve the interface between JDE fulfillment and MIS MSM product for handling sample (free copy) orders. Also worked to enhance the interface between JDE and the legacy warehouse system.

1995 - 1995 Whitman-Hart, Inc.   Denver, CO
Senior Consultant

- Redesigned the data distribution function of the First Databank application to increase its efficiency and reliability and to conform to the corporate strategy to use CPI-C for AS/400-to-AS/400 communications. The function distributes drug product information updates from the corporate AS/400 to over 40 pharmacy AS/400s nationwide.

EMPLOYMENT EXPERIENCE

1997 – 1999   International Thomson Publishing   Cincinnati, OH
Senior Technical Specialist

- Assisted with design, customization and implementation of an order fulfillment system using JDE to replace the outdated legacy system. This included implementation and customization of Order Entry, Credit, Invoicing, Inventory Control, GL, AR and development of an interface to the customized 3rd party warehouse management system.

- Provided technical assistance during the implementation of EDI with key customers and vendors. Assisted with the resolution of several TCP/JP issues, which were preventing further progress in supporting the new PUBNET/2000 protocol.

1987 - 1995   International Business Machines   Rochester, MN
Staff Programmer

- Responsible for developing plans and schedules; performing high-level and detailed design specifications for manufacturing floor control application; providing AS/400 support to Rochester and Havant, England; budget preparation for DP equipment; personnel supervision; and troubleshooting.

Senior Associate Programmer

- Worked on a team responsible for the development of an IMS/ADF application to support new 5 1/" disk drive manufacturing.

- During this time, assisted with the support and enhancement of a PC-LAN based data collection system.

- Provided technical support for IMS/ADF and LAN communication support.

1986 - 1987   International Business Machines   Greencastle, IN
Senior Associate Programmer/Analyst

- Responsible for the support and enhancement of an IMS/ADF application used to support the Dealer Warranty Claim Center. This entailed documenting the design and implementation of enhancements, creating test plans, supervise the project team, testing and installation

- Participated as a team member in the development of a strategy to migrate from a VM source control system to Library Management Facility (LMF) under ISPF.

- Assisted in the evaluation of the time savings that could be realized using Application Development Facility (ADF) for CICS application development.

1983 - 1986   International Business Machines   Rochester, MN
Associate Programmer

- Responsible for performing detailed program design from design specifications. Wrote and tested programs to design specifications and provided application support during migration from old to new floor control application.

6146 Juneberry Ct
Liberty Twp OH 45011
Phone: 513-484-1236
Fax: 513-779-1379

- Assisted with the development of a high-speed data link from an IBM mainframe to a DEC PDP-11 based Teradyne L200 printed circuit board tester.

- Enhanced a TSO application, which sent test data to other IBM locations, to support larger files and additional formats.
